

Commonwealth Home Health Care

# Home Medical Equipment, Products and Services

Commonwealth Home Health Care (CHHC) is a local, joint commission accredited medical equipment company with the goal of providing the very best service and products to aid patient care at home.

*We make patient care personal!*

*Same Day Delivery/Set-Up for most orders. Fax Rx and Demographics and CHHC will handle the rest!*

## Oxygen

For patients requiring oxygen, Commonwealth employs licensed respiratory practitioners who are available to monitor and evaluate individual needs – meaning improved patient outcomes for you. CHHC also has the ability to offer home oxygen qualification studies through an independent testing facility – with the results sent directly to the ordering physician.

## Apnea/OSA

Do you refer patients to a sleep lab when they complain about being excessively tired, snoring a lot, or having morning headaches? Before expensive testing, allow CHHC to administer Apnea Link testing – a \$5.00, non-qualifying test – which provides physicians with indicators of risk. Are you treating patients on C•PAP or Bi•PAP? Commonwealth provides personalized service and supplies.

## Power Wheelchairs

If a patient has mobility issues, Commonwealth is the local option to '1-800 companies' that fax reams of paperwork. As the treating physician, Medicare requires you to answer just nine (9) questions and have a face-to-face with your patient within 45 days of a power chair referral. Use CHHC's Assistive Technology Professional (ATP), who conducts a home assessment with the patient, completes much of the paperwork, and who will act as an advocate for funding, to aid your patient.

## Equipment

CHHC offers a complete inventory of home medical equipment for your patients! Plus we conduct fall/safety assessments during EVERY home visit.
